Facial Exosome Therapy

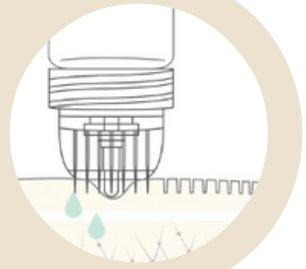

What are Facial Exosomes?

Facial exosomes are topical cosmetic products containing proteins, enzymes, growth factors, and exosomes derived from mesenchymal stem cells (MSCs).

How are Facial Exosomes effective?

- Stamping with the applicator creates controlled trauma in your skin, which can help boost the feel of firmness and smooth the look of fine lines and wrinkles.
- The invisible micro-channels infuse the top layer of your skin to help the exosomes penetrate into your skin and increase absorption of science-backed ingredients.

Benefits of Facial Exosomes

Smooth Skin Texture

Help fade appearance of dark spots and acne marks

Anti-aging

Helps reduce appearance of fine lines and wrinkles

Skincare Efficacy Boost

Improved absorption of serum that's customized to address your specific concerns.

Refresh and Re-firm

Reveal brighter looking, firmer feeling skin, and wake up with dewy, glowing skin

Ease of Application

Easy DIY facial performed from the comfort & convenience of home.

Recovery Time

Most of the visible recovery from microneedling happens in the first day or two after treatment, but healing will still be happening under the surface of your skin for up to 2 months afterwards.

At-Home Procedure & Using the Stamping Applicator

Tips:

- Best to perform this at-home procedure in the evening to wake up with glowing skin.
- Pre-Procedure: Remove all make-up and wash your face and hands. Begin treatment with clean, dry skin.
- After this procedure, your skin may be red and flushed similar to if you had a moderate sunburn. Your skin may feel dry, tight, sensitive, or inflamed. The redness should be greatly reduced within 12-24 hours.

Step By Step Procedure Instructions

1

Clean and dry skin. After cleanser, use alcohol swabs to prep the skin area.

2

Remove the stamper from the package.

3

Twist open the chamber of the device and fill with one vial of exosomes. Twist the needle head with the lid to close tight.

4

Leave the device upside down for 1-2 minutes. (Cap on, needles pointing down.)

5

Take off the lid and begin micro-infusing. Begin at the center of the face and work your way outward to cover the full face. (Treatment may be used on your neck and around eyes at the crows feet, use gentle stamps in these areas. Do not use directly below or on your eyelids.)

6

Take any leftover serum that may remain on the skin or device and pat on your face to leave on overnight.

7

Once treatment is complete, place the lid back on to the needle head and dispose safely.

Post Care Dos

- **Leave Overnight:** Leave the serum on after treatment and let it do its work. Do not immediately cleanse your skin or use any products for 12 hours.
- **Cleanse:** Beginning 12 hours after, use a gentle cleanser and cold water to wash your face about 24-48 hours after the procedure.
- **Moisturize:** Use a gentle moisturizer to reduce redness and hydrate your skin. Products with hyaluronic acid are excellent hydrators, such as Morph Rejuvenation Facial Cream.
- **Drink water:** Stay hydrated to improve your complexion and speed healing.
- **Wear sunscreen:** Apply a broad-spectrum SPF of at least 30 to protect your skin from sun damage and promote healing.
- **Ice:** Use of an ice pack or ice roller can help with sensitivity, redness, and inflammation and may be used periodically post-treatment.
- **Toss:** Toss the application stamper and the empty vial. This is a one-time use with a disposable stamper to minimize risk of infection/irritation

Post Care Donts

- **Heat:** Avoid hot tubs, saunas, steam, and excessive exercise for at least 24 hours.
- **Exfoliants:** Avoid using skin exfoliants or scrubs for 7-10 days.
- **Active Ingredients:** Vitamin C, Retinols, glycolic acid or alpha hydroxy acids (AHAs)
- **Makeup:** Avoid wearing makeup or using additional products on your face for at least 24 hours
